+91 9310190055 | Gurugram, Haryana, India | prathameshwakekar8055@gmail.com | linkedin.com/in/prathamesh-wakekar | github.com/mysticalalpha

OBJECTIVE

Analytical Computer Science undergraduate with hands-on experience in React frontend engineering and full-stack software simulations. Demonstrated track record in accelerating web application load speeds by 25% and eliminating technical debt across client modules. Seeking to apply algorithmic problem-solving skills, modern web engineering frameworks, and data-driven optimization strategies to deliver high-impact software solutions in a dynamic development environment.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science | Gurugram University, Gurugram, India Expected Aug 2026
CGPA: 7.0 / 10.0 | Academic Honors: Dean's List (All Semesters)

SKILLS

- **Frontend Engineering:** HTML5, CSS3, JavaScript (ES6+), React.js, Redux, Custom Hooks, State Management, Responsive Web Design - **Backend & Languages:** Node.js, Express.js, RESTful APIs, C++, Java, Spring Boot, Data Structures & Algorithms - **Tools & Infrastructure:** Git, GitHub, VS Code, Postman, Webpack, Babel, Windows Environment, Automation Tools - **Software Practices:** Debugging, Bug Tracking, Technical Documentation, Code Reviews, Agile/Scrum Collaboration, Systems Design

EXPERIENCE

Software Developer Intern | Austere System Limited Sep 2025 – Dec 2025
- **Accelerated** client-side page load speeds by 25% by re-architecting application state management using modern React custom hooks to eliminate redundant component re-renders. - **Built** and standardized UI architecture across 3 client-facing modules by engineering and deploying 15+ modular, highly responsive React components. - **Collaborated** with cross-functional backend engineering teams during deep-dive debugging sessions, expediting feature issue resolution times by 15%. - **Elevated** platform stability and usability by diagnosing, documenting, and patching 30+ UI layout bugs and performance bottlenecks. - **Architected** 10+ Node.js RESTful API endpoints, streamlining cross-system asynchronous data exchange and improving backend request reliability.

PROJECTS

Victor's Club Website | *HTML, CSS, JavaScript, React, Node.js* 2025
- **Reduced** user navigation friction by 30% across key content pages by building Node.js backend integration pipelines and optimizing client routing. - **Scaled** interactive web application infrastructure to support 200+ monthly active user sessions with zero reported layout degradation.

Weather Forecasting Application | *React, REST APIs, JavaScript, CSS* 2024
- **Achieved** a 95+ performance and accessibility score on Google Lighthouse across 5+ screen breakpoints by refactoring layout assets and optimizing cross-browser rendering. - **Streamlined** real-time data integration by engineering dynamic UI state handlers for live meteorological REST APIs, lowering interface latency.

JOB SIMULATIONS

Electronic Arts (Forage) | Software Engineering Virtual Experience Dec 2024
- **Boosted** execution performance by resolving 4+ core codebase bugs in C++ using optimized data structures and modular header file architectures. - **Formulated** a 5-page feature proposal for EA Sports College Football and created UML class diagrams to pitch technical concepts to leadership.

JPMorgan Chase & Co. (Forage) | Quantitative Research Virtual Experience 2024
- **Quantified** credit default risk across a 1,000+ consumer loan portfolio by executing dynamic programming algorithms in Python on raw FICO scores.

Hewlett Packard Enterprise (Forage) | Software Engineering Job Simulation 2024
- **Validated** system reliability under peak traffic conditions by constructing and executing 15+ automated unit test suites in Java Spring Boot. - **Automated** record management across 500+ simulated employee profile entries by developing a Java Spring Boot RESTful microservice for HTTP routing.

CERTIFICATIONS

- **Udemy Web Development Specializations:** 100 Hours Web Development Bootcamp (23 React Projects) | The Ultimate React Course 2025 | Complete Front-End Web Development Course - **Professional Technical Certifications:** Android App Development (34 Hours, MobDevOps) | HTML, CSS & JavaScript for Web Developers (Coursera)
